

## CLINICAL PATIENT SAFETY

- Support a "Just Culture" with anonymous, easy reporting of events, near misses, and unsafe conditions.
- Reduce sentinel events and medication errors through safety huddles and data captured from 'good catch' programs

## STRATEGIC

- Align strategic objectives with a centralized risk register prioritized by location, category, process, regulation, and objectives
- Evaluate and prioritize risks and adapt as organizational and industry needs evolve

## FINANCIAL

- Centralize risk management, safety, and compliance in a highly configurable, integrated platform for improved outcomes
- Aggregate data from insurers and TPAs for transparent claims costs

## OPERATIONAL

- Enhance risk visibility with automated data reporting and rapid response workflows including dashboards, reporting, and anonymous easy-to-use capabilities.
- Document issues, report actions taken and flag potential adverse events and use automation to accelerate investigations and responses.
- Free up staff for patient care by reducing redundant data entry and automating tasks.

ASHRM's **eight-point framework** for Enterprise Risk Management (ERM) supports a solid foundation for High Reliability Organizations, promotes program credibility, and advances ERM principles that enable a sustainable risk management culture. Origami Risk provides comprehensive integrated technology solutions from a single, integrated platform that supports informed risk management decisions.

## HUMAN CAPITAL

- Prioritize workforce health with effective employee health and on-the-job incidents management
- Simplify workers' compensation claims with workflow-enabled management for faster processing and improved return-to-work timelines
- Enhance safety culture with incident trend reports, root cause analysis, and safety meetings management

## LEGAL REGULATORY

- Use integrated dashboards and configurable reports to monitor compliance with accreditation standards and mandates.
- Track non-compliance incidents and remediation actions.
- Share case information with outside counsel, auditors, and attorneys.

## TECHNOLOGY

- Centralize insurance and claims management to enhance efficiency and cut costs
- Aggregate data from insurers and TPAs for transparent claims costs

## HAZARD

- Automate facility audits and inspections, and manage corrective actions
- Centralize location data to enable rapid response
- Implement business continuity tools for contingency planning and quick response to catastrophic events

### About Origami Risk

Origami Risk delivers market-leading healthcare risk, safety, quality, and compliance management solutions — all from a single, integrated platform that breaks down data silos, streamlines workflows, and uncovers insights that contribute to improved patient-care outcomes.
