

Simplify safety tracking, ensure compliance, and mitigate costly project disruptions

Managing risk across your **portfolio of projects** is a complex challenge that impacts **timelines, compliance, and employee well-being**. With so many moving parts, it's critical to have a solution that **simplifies safety tracking, ensures contractor compliance**, and provides **real-time insights into risks** that could result in **costly delays**. Origami Risk centralizes your **risk and safety programs**, making it easier to identify hazards, track incidents, and **proactively mitigate risks** — to help you keep projects **running on time and within budget**.

Risk Management Information System (RMIS)

Consolidate **incident data, streamline communications with insurers**, and reduce administrative tasks so you can focus on **minimizing risks and negotiating better premiums**.

- **Manage enrollment, compliance, and claims** for all participants — CCIP or OCIP — in a **centralized system**, giving you a **single source of truth**
- **Track certificates, safety records, and compliance history** for your subcontractors to align vendor selection with your **safety and risk standards**
- **Automatically batch upload claims** to your TPA, based on criteria configured to meet your **specified requirements**
- **View your data from multiple perspectives**, including by location or project, to gain **deeper insights into risk exposure** across your organization

Environment, Health & Safety (EHS)

Empower **consistent safety standards, safety training, and incident reporting**, no matter how many **worksites and contractors** you're managing.

- **Conduct pre-task plans** and analyze **near miss and incident data** to help you identify opportunities to **proactively manage workers' safety**
- **Save hours each week, improve the quality of reported information**, and ensure **nothing falls through the cracks** by **digitizing and automating your incident management processes**
- **Take your safety program onsite** with Origami Mobile for **reporting incidents, conducting audits and inspections, assigning corrective actions**, and more
- **Keep everyone informed and engaged** with **safety meetings** (such as toolbox talks) that are easy to **schedule; plan topics and track attendance**

Governance, Risk & Compliance (GRC)

Avoid **fines** and gain **visibility** across your portfolio to ensure **compliance** with industry standards and regulations, maintain **up-to-date** policies and procedures, and **track** enterprise risks.

- **Tailor risk assessments** by project, location, or region to better **prioritize resources** and implement **targeted mitigation strategies**
- **Add resilience to your supply chain** by evaluating **vendor compliance**, **safety records**, and financial stability with **automated vendor assessments**
- **Build, test, and manage continuity plans** to limit the impact of disruptions such as **supply chain failures**, **extreme weather**, and more
- **Maintain high standards for compliance and risk management** while **reducing administrative burden** with **automatic KPI and KRI alerts**

Integrated Risk Management (IRM)

Gain **end-to-end visibility** of your risk (**insurable and enterprise**) and **safety programs** by integrating your management approach with **Origami Risk's platform**.

- **Capture critical information**, from **certificates of insurance (COIs)** to **near miss reports** and much more, with an **anonymous, mobile-compatible portal**
- **Minimize downtime** and meet **tight deadlines** more consistently with **centralized and connected risk and safety data** for earlier identification and mitigation of issues
- **Improve employee satisfaction and retention** with a clear commitment to **safety, compliance, and employee well-being**

About Origami Risk

Origami Risk provides integrated SaaS solutions that simplify risk, insurance, compliance, and safety management. Origami delivers its highly configurable RMIS, GRC, EHS, and Healthcare risk management solutions from a secure, scalable platform that includes tools for centralizing data, automating critical workflows, and providing insights into risk and safety initiatives. A singular focus on client success underlies Origami's approach to developing, implementing, and supporting our innovative, award-winning software.
