# Origami Risk

Proactively analyze behaviors and conditions to keep workers safe.

Origami's **Audits & Inspections solution** enables safety professionals and workers to proactively conduct **equipment, asset, building, and process audits via web browser** or the **Origami Mobile app.** This empowers safety teams to proactively identify **risks and hazards** and put measures in place to **prevent incidents and injuries before they occur.**

Streamline processes:

Move from paper to digital, reducing time-consuming administrative activities and **ensuring risks and hazards are captured in real time.**

- **Web or mobile reporting:** Any employee or contractor can conduct audits by scanning a QR code or using Origami Mobile.

- **Corrective actions:** Ensure proper follow-up from findings by assigning corrective actions to the right people as audits and inspections are conducted.

- **Data lookup:** Employee, location, and other data types can be easily looked up and prepopulated, saving valuable employee time.

Stay in compliance:

Be ready for **regulatory compliance audits** with pre-built standards and tasking.

- **Ensure timely completion:** Schedule and assign audits to be completed at designated frequencies.

- **Easy question assignment:** Manage lengthy, unruly regulatory audits by assigning users questions or sections to complete based on job role or location.

- **Regulatory audit content:** Import audit content from 100+ jurisdictions (including all 50 states) into Origami using an add-on integration with STP ComplianceEHS.

Centralize your data:

Drive **visibility into risks and hazards**, ensuring that **preventative measures** can be put into place to reduce the risks of incidents and injuries.

- **Dashboards and reporting:** Easily track audit progress, assess status, communicate findings and create detailed reports; track key metrics such as audit scores, completed, or open audits.

- **Integrated Risk Management:** Tie audit metrics to other system data, such as incidents and claims.

Standard Audits

Leverage **40+ out-of-the-box standards** based on **industry best practices** and **OSHA regulations** to ensure your teams operate at **peak performance** and stay compliant. For unique organizational requirements, our services team can help you **modify standard forms** — or **create new checklists, audits, or assessments from scratch** — to meet your needs.

Environmental Assessments

- Aboveground Storage Tank (AST) Monthly Inspection
- Hazardous Waste Storage Area Weekly Inspection
- ISO 14001 Audit Checklist
- SWPPP Stormwater Construction Site Inspection
- Underground Storage Tank (UST) Monthly Inspection
- Wastewater Treatment Plant Inspection

Safety Audits & Inspections

- Behavior-Based Safety - Construction
- Behavior-Based Safety - General Industry
- Electric Safety Audit Checklist
- Eyewash Station Weekly Inspection
- Fall Protection Checklist
- Fire Extinguisher Monthly Inspection
- Fire Safety Inspection
- First Aid / CPR / AED Inspection Checklist
- Forklift Inspection Checklist
- Hand and Power Tools Inspection Checklist
- ISO 45001 Audit Checklist
- ISO 9001 Audit Checklist
- Ladder Inspection Checklist
- Office Safety Inspection Checklist
- OSHA Audit Checklist - Construction
- OSHA Audit Checklist - General Industry
- OSHA Excavation and Trenching Inspection Checklist
- OSHA Machine Guarding Checklist
- OSHA Scaffolding Inspection Checklist
- PPE Self-Inspection Checklist
- Truck Inspection Checklist

Process Safety Management (PSM)

- Chemical Safety Inspection Checklist
- Emergency Planning Inspection Checklist
- Exit Routes and Emergency Planning Checklist
- Hot Work Permit to Work Inspection Checklist
- JSA Audit Checklist
- Lockout/Tagout (LOTO) Inspection Checklist
- Lone Worker Checklist
- OSHA HAZCOM Inspection Checklist
- Permit Required Confined Space Checklist
- Pre-Startup Safety Review (PSSR) Checklist

Occupational Health

- Asbestos Inspection Checklist (OSHA)
- COVID-19 Prevention Inspection Checklist
- Ergonomics Quick Screen Assessment
- Indoor Air Quality Inspection Checklist
- Industrial Ergonomics Inspection Checklist
- NIOSH Lifting Equation
- Office Ergonomics: Self-Assessment
- Rapid Entire Body Assessment (REBA)
- Rapid Upper Limb Assessment (RULA)
- Strain Index
- WISHA Lifting Analysis

About Origami Risk

Origami Risk is an integrated platform for risk, safety, and compliance. Origami's EHS suite, available on web and mobile, drives visibility into safety data and initiatives in a single, centralized system.
