

Insurance Core Systems on a Single Platform

Capture new opportunities faster than ever before with a cloud-native platform that includes solutions to get you up and running on a tight deadline, so you can begin seeing ROI as quickly as possible. With Origami you can streamline quoting, underwriting, rating, renewals, billing, and claims—all from a secure, unified application that's supported by a team of experts dedicated to addressing the needs of MGAs, MGUs, and program administrators.

Policy Administration

- Accelerate underwriting and policy issuance processes
- Manage rating factors, calculations, and underwriting rules without the need for custom development
- Apply the latest bureau content
- Support policy changes, out-of-sequence endorsement processes, and persona-specific workflows
- Simplify the updating of exposure values for premium audits with an intuitive data collection tool
- Quickly generate quotes and proposals for prospective and current policies or renewals
- Provide staff with a centralized system for viewing and updating agency contact information, billing, commissions, policy details, and the status of applications or renewals

Billing

- Manage multi-level (direct, agency, and account) billing
- Configure standard and custom payment plans to fit your business model
- Process premium invoicing with advanced endorsement options
- Optimize commission calculations based on written, invoiced, and collected premium
- Simplify disbursements through electronic payment processing and check issuance
- Enhance payment flexibility with configurable allocation and electronic payment processing
- Support equity-based cancellation (equity billing)

Dashboards & Analytics

- Power data-driven, contextual decisions based on analytics and benchmarking
- Configure dashboards and workbenches for any role
- Deliver key insights quickly and seamlessly with robust reporting capabilities

Loss Control

- Provide risk management tools to your staff and commercial policyholders
- Automate your loss prevention initiatives by creating audit and inspection checklists
- Document and track the results of incident investigations, perform on-site audits, then automate distribution of safety bulletins and periodic follow-ups

Digital Engagement

- Engage policyholders and agents by providing on-demand digital access to their data via a secure portal
- Provide personalized and guided journeys, configured for multiple user types including underwriters, CSRs, adjusters, agents, insureds, claimants, and vendors
- Leverage self-service capabilities to view dashboards, report incidents and claims, generate reports, submit renewal information, and review policy and claim details or pending proposals

Claims Administration

- Automate claims administration workflows and processes from first notice of loss through final claim settlement and document handling, reserving, and payments
- Leverage data to implement best practices, ensure compliance, and enable collaboration with stakeholders
- Configure workflows and screens to automate your processes and enforce best practices
- Add third-party claims data feeds for severity analysis, cause and effect correlations, loss run reports, and more when working with a TPA or carrier to adjudicate claims

About Origami Risk

Origami Risk is a modern cloud-native platform built on multi-tenant SaaS architecture to offer a lower cost of ownership that alleviates painful upgrades and expensive IT resourcing while continuously delivering new innovative development.
