

Comprehensive risk evaluation for proactive safety management

Identifying and mitigating risks is key to ensuring your workers go home safely. Our Safety Risk Assessment solution creates a systematic, centralized, and thorough approach to evaluate potential hazards and prioritize resources to help prevent incidents and injuries.

Risk Scoring and Analysis

Quickly identify and assess potential hazards to prevent accidents.

- Add and score risks for any domain, such as JSAs, incidents, and audits, to gain insight into the greatest hazards across the organization and better prioritize resources.
- For each risk, assign suggested controls and score both the inherent and residual risk based on configurable fields like severity and probability.
- Determine and report on the efficacy of controls in reducing residual risk.

Enterprise-Wide Visibility

Roll up scores for executive and enterprise risk management team reporting for better organizational visibility and buy-in.

- Get a global view of safety risks broken down by child risks on the risk register.
- Drive cross-team collaboration and communication, ensuring the greatest risks by location or domain are highlighted.
- Gain executive buy-in for resource allocation to mitigate the greatest risks and hazards.

About Origami Risk

Origami Risk empowers leaders in insurance, risk, and safety with a purpose-built, cloud-native platform that optimizes workflows for better data, better insights, and better collaboration. Through highly configurable solutions integrated on a single platform, Origami Risk supports the management of the full lifecycle of risk, from prevention to recovery—helping the experts reduce harm and loss, and respond more rapidly and effectively when it happens. Grounded in continuous innovation and a foundational focus on client success, Origami Risk is trusted by leading organizations to enable greater resilience as they build for the future.

		SEVERITY				
		Incidental (1)	Minor (2)	Serious (3)	Major (4)	Catastrophic (5)
PROBABILITY	Very Low (1)	L	L	M	M	H
	Low (2)	L	L	M	H	H
	Medium (3)	L	M	H	H	EH
	High (4)	M	M	H	EH	EH
	Very High (5)	M	H	EH	EH	EH

From Analysis to Action

Set up workflows to trigger actions, tasks, and emails based on risk scores and thresholds to take immediate action on the most hazardous risks identified.

- Ensure proper notification to the relevant stakeholders to address the most pressing risks.
- Track follow-up on actions and tasks with dashboards.
- Leverage automated workflows to reduce administrative burden.
