

Streamline critical functions including member management, underwriting, renewals, billing, claims administration, risk management and loss control—all from a single, unified platform designed to address the challenges of member-owned non-profit pools.

Comprehensive Pool Management Cloud Software

Connect Data Silos

Origami Risk breaks down barriers between disparate data sources across policy, claims, loss control, and risk management, providing a unified view of member information for better decision-making.

Enhance Staff Efficiency

Empower staff to accomplish more with a platform that automates routine tasks and adapts to your flow of work, freeing up valuable time for member service and strategic initiatives.

Empower Member Self-Service

Allow members to view and submit claims, renew policies, and access data effortlessly, driving member engagement and satisfaction with powerful member portals.

Control Your Workflow

Origami Risk's advanced business rules, assignment, and admin flexibility allow pooling organizations to manipulate fields and views without relying on external coding, saving the hassle of lost time and expense of traditional vendors.

Less Downtime, More Service

Origami Risk's rapid implementation, efficient data migration, and out-of-the-box functionality minimize downtime and accelerate savings. Regular feature updates ensure pools are always on the latest version, maximizing service delivery.

Insightful Reporting

At-your-fingertips, personalized reporting and benchmarking capabilities make data analysis straightforward and powerful. Use dashboards, charts, and graphs to gain actionable insights, anytime or anywhere.

“Anything we need to drive member value is now possible. Origami's attractive, configurable UI and robust API framework enable the IT team to support the business in ways that just weren't possible before.”

Sam Luppino | IT DIRECTOR PERMA

About Origami Risk

Origami Risk is a modern cloud platform for insurers, MGAs, pools, and TPAs looking for speed-to-value advantage in modernizing legacy core systems and launching new products. Origami's multi-tenant SaaS architecture offers a lower cost of ownership that alleviates painful upgrades or expensive IT resourcing while continuously delivering new, innovative developments. The Origami core platform for policy, billing, claims, risk management, and loss control is built for scalability allowing clients to extend business footprints, easily integrate with the insurance ecosystem, and un-silo data to yield powerful business insights.

Manage Risk Financing with Ease

- **Transform your insurance decisions** with a complete picture of **your claims and loss data**
- **Streamlined, all-in-one system** for setting reserves, generating payments, managing **self-insured retention** and **excess layers of coverage**, and submitting claims data to third parties (captives, state reporting, TPAs, carriers, and more)
- **Built-in flexibility** to handle the range of **simple to complex administration and insurance processes and functions**
- **Manage your entire insurance program** across all lines of coverage, including TCOR, insurance fees, counterparty exposure, and **risk financing complexities**
- **Easy access to all insured information** including loss histories, certificate management, and policy history

“There’s a lot of value in Origami because you can aggregate and mine data across multiple departments and locations in a single system. You just can’t do that when you have multiple tools or systems to manage your data.”

Anne Ussery

DIRECTOR OF RISK OPERATIONS / VANDERBILT UNIVERSITY MEDICAL CENTER

About Origami Risk

Origami Risk delivers market-leading healthcare risk, safety, quality, and compliance management solutions — all from a single, integrated platform that breaks down data silos, streamlines workflows, and uncovers insights that contribute to improved patient care outcomes. The most experienced service team in the industry ensures that client success is our central focus.
