

Comprehensive & Innovative Claims Management Software

With Origami Risk — the risk & insurance industry's leading claims and risk management information system — take full advantage of award-winning solutions and platform flexibility to streamline operations, improve service, and offer added value to your existing and prospective clients.

Claims Administration

Origami Risk provides full claims adjusting functionality for the end-to-end handling of claims for all commercial lines of insurance. Standardize best practices to ensure adjusters adhere to account instructions and provide consistent service to clients. Automate tasks and regulatory reporting for increased efficiency.

Analytics & Reporting

Gain a competitive advantage by offering customers better dashboards, reports, and graphs. Draw from a standard suite of reports, as well as powerful custom reporting tools, to provide clients with the data they require, while reducing the administrative costs associated with ongoing requests for reports.

Platform Flexibility & Self-Service

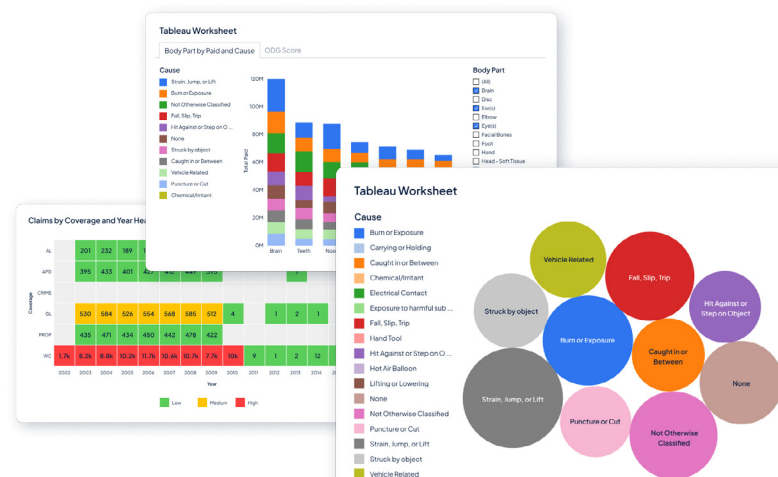

Designed for flexibility, Origami Risk allows you to make the platform your own. Accommodate client-specific requests, make system adjustments, and adopt new functionality as your client base expands and your business continues to grow. Access to administrative tools means you no longer have to wait for a vendor to add fields, adjust workflows, update business rules, or schedule secure file transfers.

Data Tools

Import data – including claims, transactions, incidents, locations, HR information – into the system from virtually any source, including legacy systems and third-party applications. Utilize a library of pre-defined spreadsheets to upload data manually or on a set frequency. Encrypt and export data from the system using on-screen administrative tools.

Client Portal

Engage clients by giving them access to their data via a secure client portal that uses your branding. Clients can log in to view dashboards, generate reports, and review claim details.

About Origami Risk

Origami Risk empowers leaders in insurance, risk, and safety with a purpose-built, cloud-native platform that optimizes workflows for better data, better insights, and better collaboration. Through highly configurable solutions integrated on a single platform, Origami Risk supports the management of the full lifecycle of risk, from prevention to recovery—helping the experts reduce harm and loss, and respond more rapidly and effectively when it happens. Grounded in continuous innovation and a foundational focus on client success, Origami Risk is trusted by leading organizations to enable greater resilience as they build for the future.
