

Streamline Exposure Tracking and Values Collection

Eliminate data silos and manual tasks with a centralized, purpose-built solution for tracking assets, exposures, and insurance values. Origami Risk's Exposure Management module streamlines the collection, validation, and oversight of exposure data. This empowers risk teams to confidently plan for renewals, support underwriting, and forecast insurance needs. With tailored tools for mapping exposures and automating workflows, your organization can operate from a single source of truth and make faster, more informed risk decisions.

Centralize and Streamline Exposure Data

Track and manage exposures with greater accuracy and control.

- Create a centralized repository for all assets, locations, and exposure values — ensuring consistency across claims, policies, and insurance submissions.
- Configure collection fields to align with broker or insurer requirements, reducing rework and accelerating renewal planning cycles.
- Support complex organizational structures and acquisitions with flexible hierarchies for financial and operational reporting.
- Import prior-year data or third-party files for faster setup and higher user completion rates.
- Map exposures to incidents, claims, and policies to enable end-to-end risk visibility and historical analysis.

Automate Values Collection Workflows

Eliminate manual outreach and reduce submission bottlenecks.

- Launch automated collection campaigns with task assignments, follow-ups, and escalation rules to reduce admin hours and improve on-time completion.
- Assign responsibilities by role, location, or region to match organizational structure and avoid confusion or duplication.
- Trigger dynamic reminders and email templates based on user status, ensuring engagement without overwhelming contributors.
- Embed prior-year values directly into forms to minimize keying errors and improve data accuracy across submissions.
- Enable backup assignments and self-service task reassignment to keep collections moving even during vacations or turnover.

Enhance Visibility and Oversight

Monitor progress and ensure accountability throughout the process.

- Leverage real-time dashboards showing campaign progress, open items, and late assignments to allow risk leaders to intervene early.
- Use visual indicators and automated reports to identify stalled submissions, inconsistent data, or problematic locations.
- Track all email communications by location to maintain full documentation for audit and regulatory purposes.
- Export collection status and value summaries for internal reporting or broker collaboration, keeping renewal timelines on track.

Drive Better Insurance Decisions

Enable confident renewal planning and reduce total cost of risk.

- Provide underwriters with clean, timely, and complete exposure data to improve confidence in valuations and risk appetite.
- Uncover anomalies or missing values ahead of submission deadlines, avoiding late-stage surprises or premium disputes.
- Link exposure data to claims trends and loss history to inform insurance program structure and retention decisions.
- Improve data transparency and trust with finance and executive teams, supporting better forecasting and budget alignment.

About Origami Risk

Origami Risk empowers leaders in insurance, risk, and safety with a purpose-built, cloud-native platform that optimizes workflows for better data, better insights, and better collaboration. Through highly configurable solutions integrated on a single platform, Origami Risk supports the management of the full lifecycle of risk, from prevention to recovery — helping the experts reduce harm and loss, and respond more rapidly and effectively when it happens. Grounded in continuous innovation and a foundational focus on client success, Origami Risk is trusted by leading organizations to enable greater resilience as they build for the future.
