

Improve workers' compensation outcomes and control claims costs

Workers' compensation programs require risk and claims teams to balance employee outcomes, rising claim costs, regulatory requirements, and growing administrative demands. Origami Risk brings workers' compensation data and workflows together in a single platform, streamlining processes, improving oversight, and flagging high-risk claims before costs escalate. Self-administered programs and those working with TPAs and carriers get the visibility and control to manage claims from initial incident through resolution.

Streamline claims management and improve outcomes

Automate workers' compensation processes, strengthen oversight, and give your team the insights to manage claims and costs proactively.

- Simplify incident and injury reporting with configurable web and mobile intake.
- Automate intake, triage, and routing to prioritize claims and get them to the right people faster.
- Trigger tasks, alerts, approvals, and communications based on claim events, status, or financial thresholds.
- Manage reserves, payments, outstanding balances, diaries, notes, litigation, and other claim activity in one place.
- Use AI-generated claim summaries to quickly understand claim history and identify high-risk claims that may require attention.
- Monitor claim trends, financial performance, and program results with configurable dashboards and reporting.
- Analyze adjuster performance and claim outcomes to identify opportunities for improvement.
- Track litigation, subrogation, recoveries, and associated costs to reduce financial exposure.
- Maintain a complete, auditable record of claim activity, documentation, communications, and decisions.

Support better return-to-work outcomes

Coordinate the information and activities needed to get employees back to work safely and efficiently.

- Track lost time, leave of absence, and return-to-work activity directly within the claim file.
- Centralize claim, employee, and related documentation so stakeholders have access to the information they need.
- Use automated tasks and notifications to keep return-to-work activities moving and reduce missed follow-ups.
- Coordinate communications and activities across claims, risk, HR, and other stakeholders.
- Report on return-to-work status and outcomes alongside your broader claims data.
- Connect workers' compensation claims with incident and safety data to identify trends and opportunities to prevent future injuries.

Simplify workers' compensation compliance

Reduce administrative burden and keep your team on top of complex reporting requirements.

- Automate jurisdictional FROI/SROI reporting and electronic submissions.
- Pre-populate required regulatory forms with claim data and validate information to help reduce errors and rejections.
- Track submission history, acknowledgements, and corrections within the claim record.
- Automate CMS Section 111 reporting workflows and track submission status and responses.
- Generate OSHA reporting files and logs using incident and injury data already captured in Origami Risk.
- Maintain the documentation and audit trails needed to support internal reviews, audits, and compliance activities.
- Use configurable workflows, timelines, and notifications to prevent required steps and deadlines from being missed.

Connect workers' comp data across your risk ecosystem

Connect data from across your organization and build a more complete view of the factors driving workplace injuries and claim costs.

- Integrate data from TPAs, carriers, HR, payroll, accounting, medical bill review, pharmacy benefit managers, and other third-party systems.
- Aggregate and normalize claims information from multiple sources for consistent reporting and analysis.
- Connect workers' compensation claims with incidents, locations, exposures, and other risk information.
- Give risk and claims teams a shared source of information for analysis and decision-making.
- Analyze claim and incident data together to uncover trends, understand loss drivers, and inform loss-control strategies.
- Scale workflows, forms, integrations, and reporting as your organization and workers' compensation program evolve.
